Panax notoginseng Root and Rhizome Powdered Extract

Proposed For Comment Version 0.2

Panax notoginseng Root and Rhizome Powdered Extract

DEFINITION
The article is prepared from the dried roots, rootles, and rhizomes of Panax notoginseng (Burk.) F. H. Chen (Family Araliaceae), collected before flowering in autumn, by extraction with hydroalcoholic mixtures. The ratio of starting crude plant material to Extract is between 10:1 and 5:1. It contains NLT 90.0%-110.0% of the labeled amount of saponins calculated as the sum of notoginsenoside R1, ginsenoside Rg1, ginsenoside Re, ginsenoside Rb1, and ginsenoside Rd, on the dried basis.
